# Stephen Metts Continues Community Mobilization Against Pipeline Impacts

[2016 Tishman Center Faculty Grant Winner](#) Stephen Metts has been named an awardee of the [Faculty Fund for Multimedia Documentation of Engaged Learning](#). The Fund's main goal is to enhance

documentation of socially engaged learning and public scholarship.

**Visualizing Pipeline Impacts** will support the documentation and public dissemination of two collaborating faculty research projects that mobilize community-based action against gas pipeline impacts within the Tri-State area. These are two multimedia initiatives in partnership with the non-profit Delaware Riverkeeper Network designed for communities within rural/environmental justice zones. Collaborators: [Jess Irish](#), Assistant Professor of Design and Technology, School of Art, Media & Technology, Parsons School of Design [Stephen Metts](#), Part-time Assistant Professor, Milano School of International Affairs, Management and Urban Policy

Visualizing Pipeline Impacts will build on Mett's Tishman Center-funded project, **Mobilizing Maps for Sustainable Communities**, a robust open source mapping resource for local community members in their opposition to further expansion of natural gas infrastructure.
