

El Nino → waves, wave break
 "mavericks", ~~for~~ flooding, rainfall, drought,
 crazy weather, pre planning, warming,
 horn of Africa, South Pacific, disease,
 water shortages, government intervention,
 not good

LEAD A TEDC SKILLS LAB

SHARE YOUR FAVORITE LESSON OR SKILL

**TEDC SKILLS LABS WILL RETURN IN SPRING.
 CONTACT SUSTAINABILITY ASSOCIATE MOLLY JOHNSON
 TO DISCUSS YOUR IDEA AND SCHEDULE A LAB!
 EMAIL: MOLLY@NEWSCHOOL.EDU**

TEDC is looking for Affiliated Faculty who are interested in sharing sustainability-related skills and concepts, particularly with students from outside the program in which you traditionally teach. Skills Labs are intended to highlight skills and concepts that can be applied across disciplines.

We are excited to support a variety of Skills Lab formats based on what works best for you. The session can be a skill-based workshop in which you teach one particular skill that might be useful to students across the university. It could also be a "highlights" version of a course you already teach, or a lesson from an existing course which can stand alone.
